- Temperature vs. pressure diagnosis
- Compressor types and compressor failure analysis
- Condenser designs, replacement, and flushing
- Thermistor control functions, testing and troubleshooting
- Changes in electrical controls
- Point out recent failure trends and diagnostic tips in specific components and vehicles

FEATURING WAYNE HERNDON

Wayne Herndon started his career in the mobile A/C industry developing and managing parts programs for ARA Manufacturing and Four Seasons. He created the corporate training department for Standard Motor Products before venturing on to his own business. Herndon has owned and operated a 12 bay full service auto facility in Fort Worth, Texas for over 36 years. In 2002, Herndon received the Industry Pioneer Award from the Mobile Air Conditioning Society (MACS) for his contribution to the auto air conditioning industry. He has served on the board of the International Mobile Air Conditioning Association (IMACA) for 10 years and as President for 6 of those years.
